SIEMENS

SMOOTH TO THE TOUCH

SMOOTH PORCELAIN SURFACE FOR A SENSUAL EXPERIENCE

DELICATE PRECISION BRINGS OUT THE BEST QUALITIES OF CERAMICS

Smooth Frame

Smooth combination
between the frame
and dolly

Anti-UV material

Weather resistance
and non-discoloring

Patented V-shaped groove

Effectively reduces potential
temperature-related risks

3.4mm diameter design

Enlarges the silver
contact area and reduces
temperature-related risks

Stable center frame design

The compact frame
structure bears high-pressure,
making it difficult to distort
and easy to install.

FUNCTIONAL AESTHETICS

Smooth Frame

2-5 The multi-frame solution

The ceramic aesthetics presents an minimalist surface design where both frame and dolly are visually and tactually smooth.

LONG-TERM DURABILITY

Excellent PC Material

Specially added Anti-UV Material

High-grade PC material is paired with Anti-UV materials resulting in high tensile strength, anti-abrasivity, shock and fire-resistance and long lasting colour on the switch surface.

EXCELLENT CRAFTSMANSHIP

Mold Polishing

Automated Injection Moulding

Ceramic moulding is precisely processed to get a smooth finish and with repeated hand polishing, the mould achieves a mirror finish. Automated Injection Moulding makes clean, high-quality products.

SAFETY

Patented V-shape groove design

3.4mm diameter design enlarges the silver contact

Patented V-shaped groove design effectively reduces the carbon deposit and potential safety risks. The unique ultra-thick spherical design allows a larger contact area with the copper base, strengthening the binding force, and lowering the electrical resistance and improving service life.

STABILITY

Stable Center-frame Design

Patented anti-skid design at the mounting hole

Stable middle frame design bears high-pressure. Patented anti-skid design at the mounting hole makes it less likely to distort during installation. A higher friction surface makes it less likely to distort and improves solidity and reliability during installation.

ADAPTABILITY

The Newly Designed Saddle Terminal

The new saddle terminal can effectively house wires of different diameters. Reliability of the termination is enhanced significantly with the additional of a dual-layered scratch resistant design, making installation easier.
